To whom this may concern,

I am an adult student who spent many weeks studying C++, Software Engineering, and other IT Topics with Christopher McGrath at AAWISDOM.com and recommend it to anyone.

Christopher McGrath helped me:

-Grasp firm foundation in C++ programming and efficient coding practices,
-Obtain IT security issues and known tactics malicious virus programmers use, such as **Exploiting Buffer Overflow Input**, **Memory Sniffing**, **Memory Leak Exploits**,
-Understand more about technical building blocks of Operating Systems for developers,
-Receive Information in other IT engineering topics, and
-Get clear ideas in business, and professional trends in current IT world.

I am truly grateful with all the help, efforts, and valuable services I received. Please feel free to contact me if you have any further question to verify my recommendations.
